

Water Industry Performance Reporting: an EPA Perspective

Hamish Reid
Water and Catchment Unit

ESC Workshop 19th March 2004

- The opportunity:
 - Harmonisation of criteria;
 - Reduction in overlaps;
 - Common platforms / templates; and
 - Increased value from reporting.
- Relevant EPA directions:
 - Strategic Plan;
 - Increased complexity in decision making;
 - Increased linkages to oversight / regulatory programs;
 - Centralised reporting.

- EPA focus for reporting
 - Sewage treatment plants – effluent quality and compliance versus community information;
 - Trade waste management / water conservation;
 - Transfer system – spills, impacts & mitigation;
 - Water recycling – oversight of schemes;
 - Biosolids recycling - oversight of schemes;
 - Green house gas emissions;
 - Incidents
