Central Highlands Water — Outcomes — 2018—2023 Including updated Output targets from 1 July 2020

In this document, the water business provides a summary report of its actual performance against each of its outcome commitments for the 2021-22 reporting year. The business has given itself a "traffic light" rating (green = met target, red = not met, yellow = close or largely met) for its performance on each measure, outcome and an overall rating. The business has provided its own comments about its performance on each outcome and overall.

Following customer consultation, updated targets for six Outputs and one new Output is included in this table, effective from 1 July 2020.

Summary table

Business comments

We rated our overall performance as green for 2021-22 as the majority of Outcomes were met. This is an improvement from last year.

With the average price for customers decreasing by 2.5% we believe the overall achievement in 2021-22 represents an ongoing value-for-money proposition for all customers.

Updated Outputs apply from 2020-21

The Outputs were reviewed in consultation with our Customer Advisory Panel and the ESC with a number of adjustments to apply from 1 July 2020. This resulted in the targets to 6 Outputs being refreshed and 1 new Output being created. A full description of this process is included in the Appendix and a short description to the changes is included following each Outcome.

The changes shown are highlighted in the Outcomes table as follows:

Change

Removal of information

Explanatory note

Outcome 1: Better customer experience

Overall Outcome 1 performance for 2021-22:

Business comment

We rated the overall performance as yellow, which is similar to last year.

Accounts using direct debit increased to 8,004 this year, which was a pleasing result following promotional campaigns on the website, social media channels and through customer service contacts.

- 1f Website sessions decreased this year.
- 1g The website customer satisfaction rating improved this year following a number of improvements to usability and content.
- Major improvements in the development of electronic real-time service notifications made during the latter half of the previous year were maintained this year with 89% of all qualifying interruptions receiving an electronic notification, compared to just 4% in the initial year.

Notes on the updated Output targets from 1 July 2020

1b Accounts using e-billing

As the initial targets were achieved by customers showing great support for the new service, the baseline was reset from 1 July 2020, maintaining the target of 20% p.a. increase.

1c Accounts using direct debit

The baseline was reset from 1 July 2020 in line with decreased demand from customers for this service, maintaining the target of 10% p.a. increase.

1f Website traffic

The website traffic measure was changed from 'users' to 'sessions' to ensure a better representation of traffic to the site. The target growth rate was reduced from 20% p.a. to 15% p.a. in line with anticipated growth.

1i Customer interruptions that an SMS/email notification is sent

No change was made to the annual targets, only the number of unplanned interruptions that qualify for a notification consistent with customer preference. See Appendix for further detail.

1k <u>Customer submission of online forms</u>

This is a new measure that reflects the increasing capability of our website and customer preference to self-serve through the website using a range of self-completion online forms such as: Change of tenancy, Direct Debit request, Events booking, Information Statement Request,

Register for Concession and Update your details etc. A baseline of 3,500 p.a. based on current experience with an increase of 5% p.a. commenced 1 July 2020.

Outcome 2: Safe clean drinking water that tastes great

d Water quality complaints	Number	Target	-	NA	152	144	137	130	124
		Actual	160	141	116	83	70	88	

Overall Outcome 2 performance for 2021-22:

Business comment

The majority of Outputs have been met during the year which helps ensure customers receive and recognise high quality water.

- During 2021-22, Central Highlands Water achieved a high level of compliance with the drinking water quality standards, as detailed in Regulation 12 of the *Safe Drinking Water Regulations 2015*, across its supply systems, with the following exceptions:
 - Non-compliance with bromate levels in the Clunes supply system, associated with a sample taken 5 August 2021 related to a short-term trial
 investigating process improvements to the water treatment plant. There was no impact to customers and the bromate levels had reduced to
 normal levels by the end of August.
 - Non-compliance with lead detection in the Fiskville/Glenmore locality which was subsequently found to be erroneous, however a notification was still required to be made. The matter had no impact on the delivery of safe drinking water to customers.

Overall this Outcome was achieved.

Updated Output targets

No changes made.

Outcome 3: Reliable and sustainable water and sewer systems

Output	Unit		16-17	17-18	18-19	19-20	20-21	21-22	22-23

Overall Outcome 3 performance for 2021-22:

Business comment

3c The Daylesford IWM Plan was renamed to the Hepburn Shire IWM Plan to better represent the three towns in the Shire included in the development of the Plan, being Daylesford, Creswick and Clunes. The summary plan was published online on 17 November 2021.

Overall this Outcome was mostly achieved.

Notes on the updated Output targets from 1 July 2020

3e Sewer spills inside customer house

A note was added confirming that these customers received a significantly increased Guaranteed Service Level rebate of \$750 - which is greater than the annual Wastewater Service Fee.

One sewer spill p.a. will attract a colour grading of yellow. Any more than one incidence will be graded red.

Outcome 4: More efficient water use

	Output	Unit		16-17	17-18	18-19	19-20	20-21	21-22	22-23
а	Digital Metering program - No of digital meters	Number	Target	-	NA	Targets	to be esta	blished w	ith project	scope
	(replace all meters with digital meters by 2022-23)		Actual	0	NA	On track	On track	On track	See note

			Actual	150	157	160 On track	151 On track	146 On track	147 On track	
С	Non-Revenue Water	Percentage	Target	-	11%	On track	On track	On track	On track	9%
			Actual	11%	10.5%	10.4% On track	10.2% On track	11.7% Off track	10.8%	
d	Rainwater Tank Installations	Number	Target	-	NA	≥100	≥100	≥100	≥100	≥100
	Rainwater Tank Rebates		Actual	0	NA	387	606	1,168*	≥100	

Overall Outcome 4 performance for 2021-22:

- After a detailed tender process to identify a supplier for the Provision and Installation of a Digital Metering Solution, CHW did not award a contract and decided to terminate the procurement process. CHW intends to continue to seek a provider of a digital metering solution and will issue a new Request for Tender, released Monday 16 May 2022. The Digital Metering market is very competitive, with interest in these projects very high, and we are confident of finding a partner promptly.
- 4c This year's result is an improvement on last year's and performance is moving closer towards the end of period target.

This result is obtained from Plumbing Compliance Certificate records from an external agency which was not yet available when this report was prepared. However, given the strong performance of rainwater tank installations over the past 3 years and the high level of new housing developments of the past 12 months, we are confident the target will be easily reached.

Overall this Outcome was largely achieved.

Notes on the updated Output targets from 1 July 2020

4d Rainwater Tank Rebates

The title of the Output was changed to 'Rainwater Tank Installations'. This change reflects the variety of means that tanks are now being installed following changes to the Land Development process, where subdivisions greater than 10 are required to have a rainwater tank installed by the developer. The change signals a more accurate measure of the intent of the original Output – for CHW to facilitate the installation of rainwater tanks on houses and encourage sustainable and efficient water use.

Outcome 5: Increased value for money

	Output	Unit		16-17	17-18	18-19	19-20	20-21	21-22	22-23
а	No individual tariff to increase greater than CPI	Pass/Fail	Target	_	NA	Pass	Pass	Pass	Pass	Pass

е	Assist vulnerable customers – develop early	Pass/Fail	Target	_	NA	Pass	NA	NA	NA	NA
	intervention strategy and targets by 30 June 2018		Actual	NA	NA	Pass	NA	NA	NA	

Overall Outcome 5 performance for 2021-22:

Business comment

- 5a Prices on average for the average homeowner reduced by 2.5% over the course of the year.
- Note the target for the Wastewater Service Fee for years beyond 2018-19 should be NA as the measure only applied to 2018-19.

5c The result of 7.0 for value for money rating while remaining consistent has fallen behind the end of period target.

Overall this Outcome was achieved.

Updated Output target

No changes made.

APPENDIX

Updated Output targets

The Outcomes table highlights the changes Central Highlands Water (CHW) has made to six Outputs, including the creation of one new Output commencing 1 July 2020. This was the result of a detailed review of performance and in consultation with our Customer Advisory Panel. These changes and the process followed are consistent with the ESC's expectation that the Outputs should be reviewed as per the following:

- Outcome commitments were not meant to be fixed for a regulatory period we envisaged a dynamic process
- Expanding and refining Outcomes commitments can be done at any time
- Continue to engage with your customers it is an ongoing process
- Seek customer feedback and demonstrate how customer priorities continue to be reflected in your Outcome commitments

The following changes will apply from the 2020-21 financial year (i.e. from 1 July 2020), which is the third year of the regulatory period. The changes and rationale are summarised in the following table. The changes are incorporated into the Outcomes table.

Output measure	Change	Rationale
1b Accounts using e-billing	Reset baseline from 2020-21	The performance target of 20% p.a. has been easily surpassed so it makes sense to reset the baseline. (Refer to extract from 2019-20 Outcomes Report below 1c).
