

Minimum feed-in tariff 2024-25

Submission received through Engage Victoria

Date submitted: 22/11/2023

Submission written by: Mark

From November 2023, we began accepting submissions on our Minimum feed-in tariff review 2024-25 via Engage Victoria (www.engage.vic.gov.au). On this website, people were given the opportunity to send us a response to a set of questions we provided.

What parts of our proposed methodology for setting the flat and time-varying minimum feed-in tariffs do you support?

Peak times

What parts of our proposed methodology should we change?

Amount. How can it be end-users pay more to buy power than can sell it? It's a huge disparity and reduces the benefits. Seems like utility companies can pocket the profit from end-users' investment.

For our overall methodology, or parts of it, what alternative methodologies should we consider?

Utilities are forced to buy power at the same rate they sell it, at any given time of day.
