

Minimum feed-in tariff 2024-25

Submission received through Engage Victoria

Date submitted: 5/12/2023

Submission written by: Peter Rice

From November 2023, we began accepting submissions on our Minimum feed-in tariff review 2024-25 via Engage Victoria (www.engage.vic.gov.au). On this website, people were given the opportunity to send us a response to a set of questions we provided.

What parts of our proposed methodology for setting the flat and time-varying minimum feed-in tariffs do you support?

What parts of our proposed methodology should we change?

With the feed in tariffs being so low it is not worth having solar panels. The maintenance exceeds any advantage. It would seem there will be a huge number of panels disconnected. How do we dispose of them.

We purchased them for many thousands of dollars it was worthwhile. Now uneconomic. Sad that we have all been led down the wrong garden path.

For our overall methodology, or parts of it, what alternative methodologies should we consider?
