

Minimum feed-in tariff 2023-24

Submission received through Engage Victoria

Date submitted: 20/12/222

Submission written by: Anonymous 6

From December 2022, we began accepting submissions on our Minimum feed-in tariff review 2023-24 via Engage Victoria (www.engage.vic.gov.au). On this website, people were given the opportunity to send us a response to a set of questions we provided.

What parts of our proposed methodology for setting the minimum single and time-varying feed-in tariff rates do you consider are appropriate?

Being able to credit Solar feedin at above minimum rates

What parts of our proposed methodology should we change?

Make it simpler and set a maximum charge out rate for customers providing solar feedin. The current situation is allowing low cost of purchase for the power companies and extremely high charge out rates. Charge out rates should be capped at a much lower rate than the power companies offer.

For our overall methodology, or parts of it, what alternative methodologies should we consider?

See above
