

## Greenhouse gas co-efficient 2019

### 21 December 2018

The commission's Guideline 13: Greenhouse Gas Disclosure on Electricity Customer's Bills requires the co-efficient for a calendar year to be calculated and advised to retailers.

The Department of Environment Land Water and Planning has advised the new co-efficient retailers are to use in Victoria is: 1.20 kg CO<sub>2</sub>-e / kWh (kilograms of carbon dioxide equivalent emissions per kilowatt hour)

This figure should be applied directly to the amount of electricity consumed by the end-user.
