Water Prices 2009-2013

5.09

Dear Commissioners.

My Submission - COMMENT.

At your request. AGE 26 APRIL

It does not matter what the price of water is now or later, it will be negated -

Because;

The Govt is allowing 1500 people per week into VICTORIA.

That is -

over 200 A DAY - every day plus.

Natural Birth Rate over Deaths.

It is just crazy!

No matter how much we spend on water, + savings - pricing + desal if we continue to encourage immigrants 200,000 + per annum we will never have enough water

A case of Populate + perish - or populate + dehydrate

Instrach of Building vast infrastructures; put pressure on Govts (both State + Federal) to dismount from the wild charges of infinite growth.

Our Land is $\frac{1}{3}$ desert.

We cannot sustain unjettered growth of ours faultfully
